# OnScreen

A digital adoption platform that makes it simple to train your people to use the software your business runs on.

Accelerate software adoption and mastery

Every minute your employees spend learning how to use software is a minute that isn't spent adding value for your business. OnScreen allows you to quickly create and embed step-by-step guides directly into software like Workday, Salesforce, SAP, and more. These guides produce:

higher software adoption   **increased productivity**   **decreased time to proficiency**

Enterprise software is complex – and critical to business success. By providing your people with actionable guidance at the point of need, OnScreen makes your software training smarter.

Why OnScreen?

OnScreen is built from the ground up to be simple: simple to use, simple to support, and simple to buy. With OnScreen, you can hit the ground running

Compatible with all apps
OnScreen can be used with any web-based application and is specially optimized for SAP.

Intuitive to use
Any trainer can publish a guide in 27 minutes or less — on the first try.

Easy to roll out
OnScreen is 100% web-based with nothing to install.

Who Needs OnScreen?

Any company can use OnScreen to accelerate the adoption and mastery of digital tools. But OnScreen is particularly helpful to enterprises that are:

|		
Experiencing need for onboarding.	Implementing new software.	Inexperienced user base.
Maintaining regulatory and governance and compliance	Wasting time and money on outdated training approaches.	Using traditional documentation methods which is a hassle to maintain.

Results that matter

5x savings
- Accelerate onboarding time.
- Slash training costs.
- Save on development hours.
- Reduce support and escalation calls.

3x productivity
- Increase process and data accuracy.
- Eliminate learning-related stoppages.
- Transform workers into power users.

4x efficiency
- Standardize process execution.
- Streamline training development.
- Deliver access to real-time guides for any task.

"Excellent Training Tool - I found OnScreen a very useful tool to train our users on the job. It's simple to use. Trainers can create step by step guides in minutes. All guides are available in a single click. No hassle of storing trainging documents and spending time finding them."
